## Vintage Air Designed SuperFlow™ Micro Tube Condensers

This SuperFlow condenser design was pioneered by Vintage Air to provide leading-edge technology and superior performance with today's 134a refrigerants. The importance of this unique new micro tube design and its improved refrigerant flow cannot be overemphasized. By providing increased refrigerant contact with the micro tube walls and multiple passes per circuit for low restriction pathway, SuperFlow condensers **provide up to 40% more capacity** than comparably sized old-style tube-and-fin condensers.
